

# Digital Mammography Monitor RadiForce® GX1030

**10MP** RadiForce<sup>®</sup>  
**GX1030**

With its widescreen format, the GX1030 is an optimal replacement for traditional dual head 5MP display installations. With the unobstructed viewing space, applications can offer greater hanging protocol flexibility for richer comparisons between past and present images.

- Finest details with Mono-Pixel design offering a pixel pitch size of just 0.158 mm.
- Compliant with the DICOM Part 14 standard offering image accuracy and consistency for use in medical fields.
- The consistent color point and bezel-less configuration of a single monitor serve to reduce eye fatigue for the radiologist while lowering the administrative and QA costs for the operator.
- The Integrated Front Sensor provides independent verification measurement of the brightness and grayscale tone at the front surface of panel.
- The internal Test Pattern Generator can be used to visually inspect image quality.
- Digital Uniformity Equalizer (DUE) function for optimum brightness uniformity.
